

Façade Residential Sliding & Folding Door Systems

Door Specifications

- Maximum Door Weight: 60kg
- Door Thickness: 44-60mm
- Maximum Door Width: 900mm
- Maximum Door Height: 3000mm
- Top Channel Dimensions: 25mm (w) x 25mm (h)

● Door Construction:

For suites of 3 or 5 folding timber doors. Not suitable for floating suites. Best performance is achieved when the doors open outwards, but the system can be adapted with a flat cill where inward opening is preferred. Always engage holdback catch before operating.

Hardware Specifications

- Stainless steel top channel drilled and countersunk screwed directly to soffit
- Floor track unnecessary under swing leaves
- Suitable for timber doors
- Stainless steel bottom track, drilled and countersunk

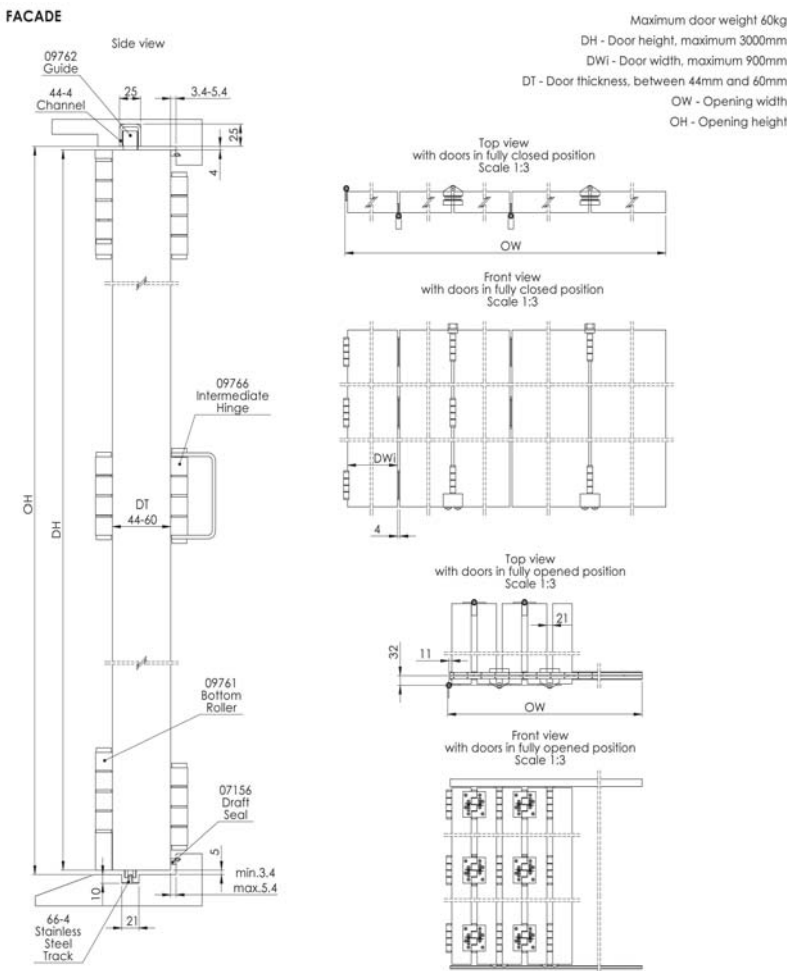

Façade

Residential Sliding & Folding Door Systems

Product Overview

Façade is a bottom rolling system for fully rebated timber doors. Ideal for applications with insufficient head room or support for a top hung system and is suitable for terraces and patios.
