

Technical Specification

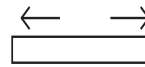

Maximum Door Weight -
150 kg (220 lbs)

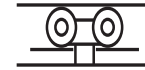

Maximum Door Height -
4500mm (14'9")

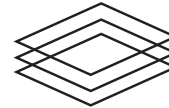

Door Thickness -
42-65mm
(1 2/3 " to 2 5/9 ")

Maximum Door Width -
1500mm (4'11")

Top Mounted

Door Material -
Timber

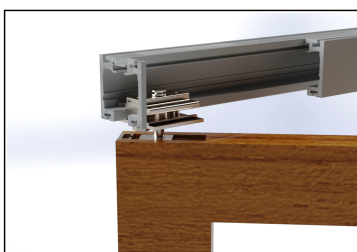

Product Overview

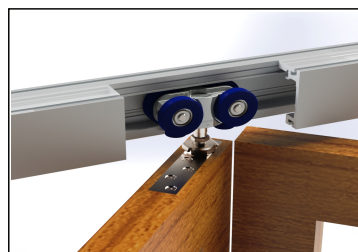

Foldaside 150 is sophisticated high quality reliable hardware system designed for internal or external folding doors requiring heavy weight capacity up to 150 kg per leaf, ideal for partitioning off rooms in either residential or commercial applications

System Highlights

- For timber, timber framed or composite doors.
- Hardware made of stainless steel 304.
- Up to 6 panels folding in one direction.
- 3D concealed hinges (silver finish) allow vertical, horizontal and depth adjustment for perfect alignment.
- Hardware components are non handed and are suitable for both inward or outward opening applications.
- Closed panels are secure by flushbolts, a choice of style and length to suit customers requirements.

Top Pivot Assembly

4 wheel intermediate hanger

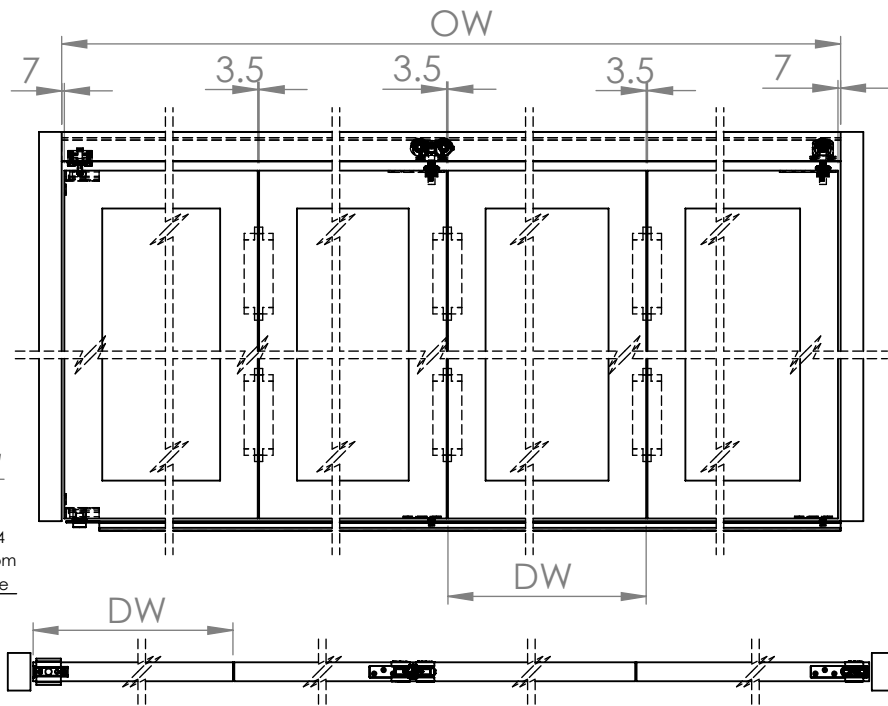

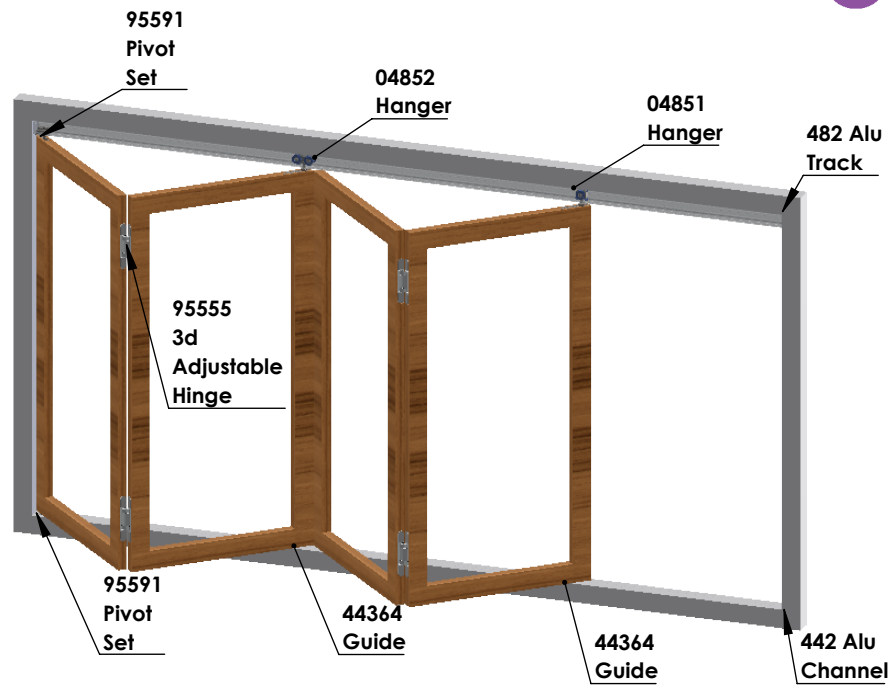

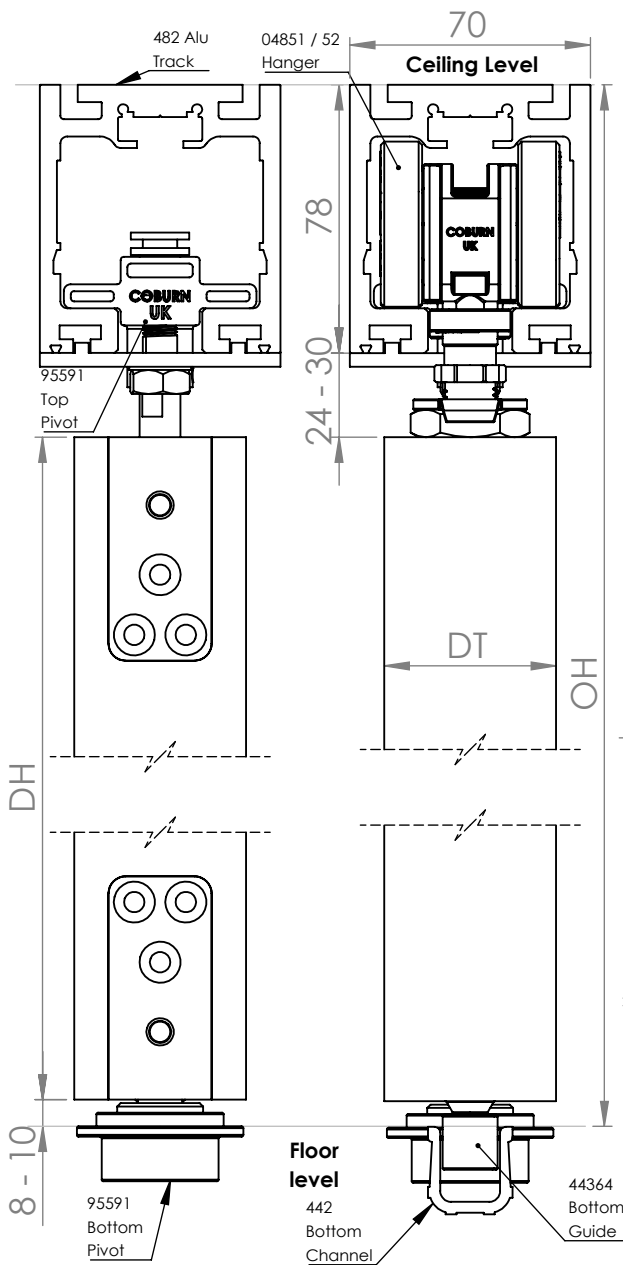

Bottom Pivot Assembly

Concealed Hinge
